

Remote control system for an electricity, gas and water supplier

Segment: Utilities

End user: HERA S.p.A. (IT)

System integrator: I.D.&A. S.r.l. (IT)

Realization date: 2009 - 2011

Requirements:

- Join all 7 different geographic regions in one control center
- Support a high number of SCADA clients
- Realization of the historical data management with Oracle

Solution:

- Disaster Recovery System
- Distributed and redundant client-server architecture
- 125 clients with more than 100,000 I/Os
- Full IEC 60870-5-104 support

Benefits:

- Complete integration into other systems (GIS, technical call center, ARPA weather system, etc.)
- Simple changing of the application manageable through the network
- Availability of an infrastructure that supports the future growth

I.D.&A. is a WinCC OA solution partner and a well-proven system integrator in Italy for the realization of turn-key remote control systems for utility companies.

The Hera Group is one of the leading firms in Italy in managing services related to the water cycle, in the energy sector and environmental services management
